

GIGITH KUNJUMON

SENIOR UX DESIGN LEADER | Enterprise UX Strategy, DesignOps & AI-Assisted UX Governance

Bangalore, India | (+91) 949 788 8314 | gigith.k@gmail.com | [linkedin.com/in/gigithkunjumon](https://www.linkedin.com/in/gigithkunjumon) | loomandforge.substack.com

PROFILE

UX leader with 13 years of experience building enterprise design practices from the ground up. Specialises in scaling cross-functional design operations, evidence-based product strategy, and AI-assisted workflows. Builds operating systems that connect customer evidence, product decisions, and repeatable UX quality practices.

Impact snapshot: Scaled UX capability 2 to 28 across domains | Portfolio UX baseline | Upstream discovery and quality practices

EXPERIENCE

Senior Manager, UX Design | Global industrial technology company | May 2018 - Present | Bangalore, India

Progression: UX Designer > Senior UX Designer > Lead UX Designer & System Architect > Manager, UX System Architecture > Senior Manager, UX Design

- Transformed a developer-first delivery culture into a design-led product practice by introducing structured discovery, early prototypes, and PO-approved design briefs before development.
- Moved UX engagement upstream into pre-discovery, enabling customer validation before requirements were locked and R&D investment, reducing downstream rework risk.
- Scaled UX capability from 2 to a 28-person cross-domain team through standards, coaching, shared practices, and portfolio-level adoption visibility.
- Defined a portfolio UX baseline spanning discovery, ideation, validation, and delivery: workshops, personas, journeys, design-system alignment, usability testing, design QA, UX debt visibility, and handoff gates.
- Created a repeatable software competitive-evaluation framework that combined customer journeys and expert review to inform product priorities and strategic opportunities.
- Led cross-functional UX enablement with product, engineering, and commercial partners: introduced customer evidence, feedback loops, developer training, and UX debt visibility.
- Publishes on design-to-code workflows and AI-assisted customer intelligence; mentors designers on ADPList and writes Loom & Forge.

Senior UI/UX Designer | Cognizant | Aug 2012 - Apr 2018 | Bangalore, India

- Delivered end-to-end UX across 5+ multinational client engagements, from co-creation workshops and heuristic evaluations through prototypes, developer handoff, and release QA.
- Served as an embedded design consultant to senior executives, translating UX rationale into product decisions and maintaining design integrity through delivery.

SELECTED LEADERSHIP INITIATIVES

Portfolio-wide UX system architecture: Defined a four-track operating model across governance, research, concept, and build. Established quality gates, a research-repository direction, journey-management practices, and design-system governance.

Competitive product intelligence: Led a reusable software benchmarking framework across two enterprise products, combining customer journeys and expert reviews to identify priority improvements and strategic opportunities.

Enterprise design system: Helped define a federated contribution model, design tokens, Figma foundations, Storybook component documentation, and a path away from repeated hard-coded UI development.

Demand-side energy management: Led experience design for an SME-focused concept using persona, JTBD, and workshop insights. The work helped frame a clearer portfolio exploration.

INDEPENDENT PRODUCT

AI Research Synthesis Tool (in progress): Building an application that ingests usability and interview data and generates living personas, JTBD statements, and journey maps with human checkpoints so research remains usable as products evolve.

CAPABILITIES

Strategy & leadership: UX vision, DesignOps, OKRs, UX maturity assessment, stakeholder management

Research: User interviews, usability testing, surveys, contextual enquiry, JTBD, persona development

Design: Design systems, information architecture, journey mapping, prototyping, user flows, wireframes

Facilitation: Design sprints, co-creation workshops, design thinking, cross-functional enablement

Tools & AI: Figma, GitHub Copilot, GitHub, Claude, AI-assisted research synthesis

EDUCATION & CERTIFICATIONS

B.Tech - Electronics and Media Technology: Karunya University | 2008 - 2012

Certified Usability Analyst (CUA): Human Factors International | 2020 | #2020-7821

Design Sprint 3.0: AJ&Smart | 2019

RECOGNITION

Highflyer Award: Enterprise technology company | 2020 | Competitive-analysis methodology and product strategy

Instant Puraskar: Enterprise technology company | 2019 | Creativity, innovation, customer focus, and rapid execution

GitHub Copilot Hackathon: Enterprise technology company | Product prototyping recognition

PUBLICATIONS & COMMUNITY

Loom & Forge: Independent design strategy publication | 2025 - Present | loomandforge.substack.com

Design-to-code workflows: Internal publication | Nov 2025

AI-assisted customer intelligence: Internal publication | Aug 2025

ADPList: Design mentor
